To rinse or not to rinse

The age-old question ... do I rinse or not rinse my jars, bottles and containers before recycling them?

The answer,

YES

All food residue needs to be removed prior to placing items in the recycling bin.

Rinse your items well and leave the lid off to dry. Place the lid back on the container before putting it in the recycling bin.

Lids must be on containers for them to be recycled as they are too small to be picked up by the sorting process on their own and will end up in landfill.
